If i recall, there were (are?) two tanks that seemed to look like that. One standing upright just south of the SBC bridge (the road bridge, not the pipe bridge), on the west side of the access road. And another one about about 100' farther south, laying on its side. With a 10' tidal surge, I'm guessing it floated right over the SBC pipe bridge.

 "McGowan, Carrie" ---01/09/2013 10:36:50 AM---I can not say whether this is from LCP or not at this time but I have no idea how it could have floa

I can not say whether this is from LCP or not at this time but I have no idea how it could have floated over the fence then down SBC and under the bridge without us seeing some evidence of it. I also do not believe the water was high enough on LCP to carry this over the fencing. I will contact them and take a look at it and review our historic site photos and let you know.

Hi Carrie and John.... see below. I believe this is yours.

Please contact Mr Kaminski to arrange a way to remove this from their property. if you want to dispose of it rather than bring it back to LCP, let me know.

jon

Subject: Rogue F berglass Tank at Tremley Point Terminal - Phillips 66

Jonathan,

Thank you very much for your phone call this morning. As we discussed, there is a tank about 40 feet by 20 feet that has washed up on our property located at: 4601 Tremley Point Road in Linden, NJ.

We believe it came from LCP Chemicals Incorporated near by.

We would like to get this off of our property, and hope the responsible party will be able to do that for us.

If the responsible party would like to stop by our site to take a look, please have them contact our Site Supervisor Mark Kaminski on his cell phone at: [REDACTED]

If you have any additional questions, please contact me.

Thank you,
Leia Heritage

Environmental Coordinator
